Material Manipulation Using the Leap Motion

Osaka University

August 7, 2013

Current Progress

- Shadows on finger objects and mesh to more easily show where hand/finger objects existed in the world.

- Silkscreen effect on the fingers to show the finger positions more easily in 3D.

Current Progress Continued.

- Changed the color of the faces that the finger objects were about to select, so that the user can easily tell which face was about to change.

- Read up on HTML5 divs for menus and menus mixing HTML elements with webGL.

Next Week

- Menus and selections.

Neighbors invited us to local festival

Special Thanks to:

- Jurgen Schulze – UCSD Mentor
- Kiyoshi Kiwokawa – Osaka Mentor
- Gabriele Wienhausen, Peter Arzberger, Teri Simas, Jason Haga, Prime Staff
