# Old-Town Osaka Viewer on Android Phone
## Osaka University
## June 29, 2012

*Sumin Wang*

# Progress

- Experimented with other virtual reality and augmented reality apps
- Experimented with GPS capabilities of Samsung Galaxy tablet (testing device)
- Investigated methods of importing .3ds files into Android application. Found some existing pipelines, the most promising of which is min3D
- Investigated the min3D framework

# Goals for Next Week

- Complete a milestone:
  - Successfully import a 3D environment (preferably from a .3ds file)
  - Use information about orientation of Android device to manipulate camera and view scene in a virtual reality
  - Integrate with GPS to add positional capability to virtual reality (investigate accuracy of GPS)
- Investigate further goals for project

*I think she has the right idea. (Found at an elementary school.)*
