INTERACTIVE MULTI-TOUCH ARTWORK DISPLAY

Shaocong (Scott) Mo & Michael Yao
NICT
July 29, 2012

PROGRESS update

- Android App:

  - Fix GridView interface

  - Now retrieve artwork description from a text file

  - Combined processing language with PX library to Java Eclipse. Spend few days on it and unable to combine Processing and Eclipse.

  - Placesticker shows negative distance when it is placed under android device; it can possibly act as a signal for connecting android to desktop

NEXT WEEK

- Research on the communication between android and the touch table

- Functionality for the phone should be ready by Wed.

- The flow of the interface should be ready next week.

- The video should be ready to view from the phone.

- Decided to use on screen method instead of notification.

- Fix Mobile Gallery's interface (touch table application) and figure out how to connect it to android

JAPANESE CULTURE-Scott

- ***Tenjin Matsuri***

  - Hundreds of people boarded some 100 boats near Tenmabashi

  - At dusk, many boats with traditional decoration sailed upstream on the river

  - Many other people gathered by the river and watched the boat festival
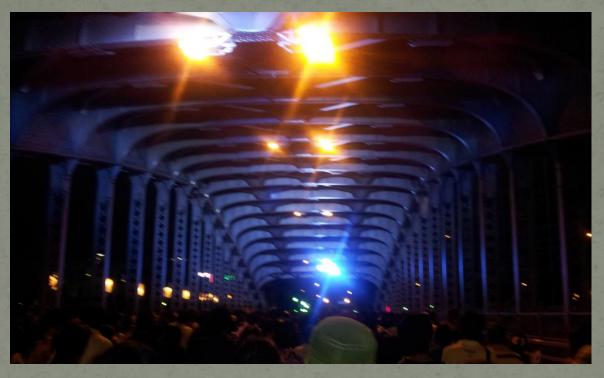

JAPANESE CULTURE-Scott

The boat festival lasted for several hours

Fireworks lit up the sky while
the boats were cruising the river

JAPANESE CULTURE-Scott

Hmmm...A lot of people. It was hard to move forward.

JAPANESE CULTURE-Michael

- ***Tenjin Matsuri***

  - People gathered by the river to watch and celebrate tenjin matsuri

  - Commercial boats traveled back and forth to attract tourists
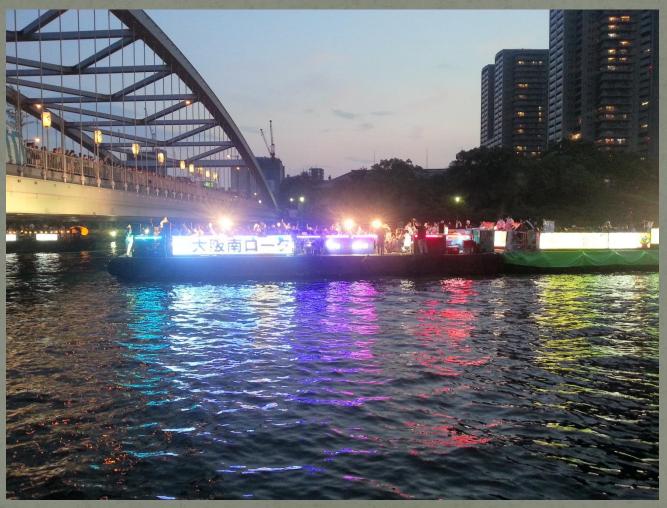

JAPANESE CULTURE-Michael

Commercial boats to advertise

The fireworks around 7:30pm

JAPANESE CULTURE-Michael

It costs 15,000 Yen to get on this boat
